

I enjoy my XM satellite radio service. I pay for it and the services I receive from it such as the weather and traffic. I strongly urge you and other law makers to respect the 1 amendment rights of us the voting public and keep the NAB from making you their pawn in this issue. If they want our business back they should be told by you the law makers they are trying to play to better their services and run XM and other satellite companies out of business the same way they are running regular radio out.
